SUMMARY

Artificial Intelligence undergraduate passionate about building real-world AI, web, and mobile applications. Experienced across the full stack of a project: data analysis and SQL, machine learning and deep learning model development, computer vision, NLP, and front-end/mobile delivery with Django, Flutter, and Firebase. AI projects published on GitHub. Currently seeking an AI/ML, Data Analyst, or Web Development internship (remote-friendly) to contribute and keep learning.

SKILLS

AI/ML: Machine Learning, Deep Learning, Computer Vision, NLP, Artificial Neural Networks (ANN)

Data: SQL, Exploratory Data Analysis (EDA), TF-IDF, Feature Engineering

Programming: Python, C/C++, Java

Web & Mobile: HTML, CSS, Bootstrap, Django, Flutter, Firebase

Tools & Platforms: GitHub, Keras, MS Excel, MS Word, Canva

PROJECTS

Image Classification System Computer Vision, Deep Learning
- Built and trained a deep learning image classification model using Keras, achieving [percentage] test accuracy
- Preprocessed and augmented an image dataset of [number] samples to improve generalization

AI-Powered Mobile Application Flutter, Firebase
- Built a cross-platform mobile app using Flutter with Firebase for authentication and real-time data
- Designed [number] app screens with a focus on usability and responsive layout

Intelligent Fake News Detection System NLP, Deep Learning, ML
- Built a fake news detection system using TF-IDF feature extraction and an LSTM deep learning model
- Classified news articles as real or fake with [percentage] accuracy

Autism Spectrum Disorder Detection ANN, Predictive Analytics
- Developed an ANN-based predictive model for early ASD detection using a behavioral dataset of [number] records
- Improved early detection accuracy by [percentage] through feature engineering and hyperparameter tuning

Sudoku Game Solver & 2D Shadow Jump Game AI, HCI, Computer Graphics
- Developed an AI-based Sudoku solver using a backtracking algorithm and constraint satisfaction techniques
- Designed an interactive 2D game with custom animations and a collision detection engine

EDUCATION

Bachelor of Science in Artificial Intelligence University of Wah *2023 – 2027*
GPA: 3.54 | CGPA: 3.42

ICS Govt Associate College for Women, Layyah *2021 – 2023*
Grade: A

Matric The Vision Girls High School, Layyah *2019 – 2021*
Grade: A+

CERTIFICATIONS

- IBM: Fundamentals of Building AI Agents (April 2026)
- Google: Introduction to AI (April 2026)
- IBM: Exploratory Data Analysis for Machine Learning (April 2026)
- Meta: Introduction to Data Analytics (April 2026)
- IBM: Deep Learning & Neural Networks with Keras (April 2026)
